Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 7-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Claims 7 and 9 are claiming the workpiece and this is not a workpiece device combination claim. How does claiming the workpiece further limit the structure of the device.

b. In regard to claim 8, It is not clear if the engraving machine is part of the invention. The structure must be positively recited is so it known what makes up the engraving machine. This is an engraving holder so how does combining a machine further limit the engraving holder device. This is not a combination claim.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 and 7- 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Burruel (4942742).

Burruel discloses a device having a tray (25) with recesses and a mold (31) with a cavity.

In regard to claims 7 and 9, a workpiece is being claimed and anything can be jewelry because there is no structure being defined for the workpiece.

3. Claims 1-2 and 7- 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Morgan (20040094043).

Morgan discloses a device having a tray (23) with recesses (27), and a mold (32) with a cavity.

In regard to claims 7 and 9, a workpiece is being claimed and anything can be jewelry because there is no structure being defined for the workpiece.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Burruel (4942742).

- a. Burruel is discussed above.
 - b. Burruel does not disclose a mold made out vulcanized rubber.
 - c. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have known to use vulcanized rubber for the mold, since it has been held to be within the general skill of a worker in the art to select known materials on the basis of its suitability for the intended use as a matter of obvious design choice . *In re Leshin*, 125 USPQ 416.
6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Morgan (20040094043).
- d. Morgan is discussed above.
 - e. Morgan does not disclose a mold made out vulcanized rubber.
7. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have known to use vulcanized rubber for the mold, since it has been held to be within the general skill of a worker in the art to select known materials on the basis of its suitability for the intended use as a matter of obvious design choice . *In re Leshin*, 125 USPQ 416.

Allowable Subject Matter

8. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Art Unit: 3723

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dietrich and Kanzelberger disclose an invention.
